Chapter 1

Class Index

1.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Chapter 2

File Index

2.1 File List

Here is a list of all files with brief descriptions:

Chapter 3

Class Documentation

3.1 Command Struct Reference

```
#include <selector.h>
```

Public Attributes

- char key
- char * text
- lambda action
- void * argument

3.1.1 Member Data Documentation

3.1.1.1 action

```
lambda Command::action
```

3.1.1.2 argument

```
void* Command::argument
```

3.1.1.3 key

```
char Command::key
```

3.1.1.4 text

```
char* Command::text
```

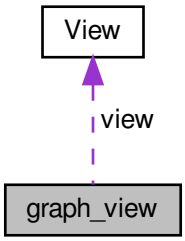
The documentation for this struct was generated from the following file:

- selector.h

3.2 graph_view Struct Reference

```
#include <graphics.h>
```

Collaboration diagram for graph_view:



Public Attributes

- View * view
- unsigned char vertical_tick_marks
- unsigned char horizontal_tick_marks

3.2.1 Member Data Documentation

3.2.1.1 horizontal_tick_marks

```
unsigned char graph_view::horizontal_tick_marks
```

3.2.1.2 vertical_tick_marks

```
unsigned char graph_view::vertical_tick_marks
```

3.2.1.3 view

```
View* graph_view::view
```

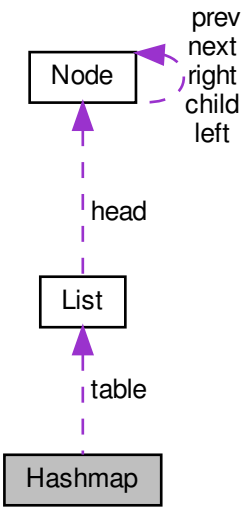
The documentation for this struct was generated from the following file:

- graphics.h

3.3 Hashmap Struct Reference

```
#include <hashmap.h>
```

Collaboration diagram for Hashmap:



Public Attributes

- unsigned int elements
- unsigned int size
- List ** table
- void *(* get)(Hashmap *this, char *string)
- void(* add)(Hashmap *this, char *string, void *datum)
- void(* remove)(Hashmap *this, char *string)
- bool(* exists)(Hashmap *this, char *string)
- void(* update)(Hashmap *this, char *string, void *datum)

3.3.1 Member Data Documentation

3.3.1.1 add

```
void(* Hashmap::add) (Hashmap *this, char *string, void *datum)
```

3.3.1.2 elements

```
unsigned int Hashmap::elements
```

3.3.1.3 exists

```
bool(* Hashmap::exists) (Hashmap *this, char *string)
```

3.3.1.4 get

```
void*(* Hashmap::get) (Hashmap *this, char *string)
```

3.3.1.5 remove

```
void(* Hashmap::remove) (Hashmap *this, char *string)
```

3.3.1.6 size

```
unsigned int Hashmap::size
```

3.3.1.7 table

```
List** Hashmap::table
```

3.3.1.8 update

```
void(* Hashmap::update) (Hashmap *this, char *string, void *datum)
```

The documentation for this struct was generated from the following file:

- hashmap.h

3.4 HashmapElement Struct Reference

```
#include <hashmap.h>
```

Public Attributes

- char * key
- void * datum

3.4.1 Member Data Documentation

3.4.1.1 datum

```
void* HashmapElement::datum
```

3.4.1.2 key

```
char* HashmapElement::key
```

The documentation for this struct was generated from the following file:

- hashmap.h

3.5 I2C Struct Reference

```
#include <i2c-interface.h>
```

Public Attributes

- unsigned char i2c_address
- unsigned char i2c_slave_address
- short * registers
- void(* gyros)(float *axes)
- void(* accelerometers)(float *axes)
- void(* magnetometers)(float *axes)
- float(* temperature)()

3.5.1 Member Data Documentation

3.5.1.1 accelerometers

```
void(* I2C::accelerometers) (float *axes)
```

3.5.1.2 gyros

```
void(* I2C::gyros) (float *axes)
```

3.5.1.3 i2c_address

```
unsigned char I2C::i2c_address
```

3.5.1.4 i2c_slave_address

```
unsigned char I2C::i2c_slave_address
```

3.5.1.5 magnetometers

```
void(* I2C::magnetometers) (float *axes)
```

3.5.1.6 registers

```
short* I2C::registers
```

3.5.1.7 temperature

```
float(* I2C::temperature) ()
```

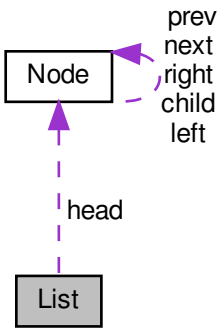
The documentation for this struct was generated from the following file:

- i2c-interface.h

3.6 List Struct Reference

```
#include <linked-list.h>
```

Collaboration diagram for List:



Public Attributes

- Node * head
- unsigned int elements
- unsigned int elements_limit
- bool doublely_linked

3.6.1 Member Data Documentation

3.6.1.1 doublely_linked

```
bool List::doublely_linked
```

3.6.1.2 elements

```
unsigned int List::elements
```

3.6.1.3 elements_limit

```
unsigned int List::elements_limit
```

3.6.1.4 head

```
Node* List::head
```

The documentation for this struct was generated from the following file:

- linked-list.h

3.7 Logger Struct Reference

```
#include <logger.h>
```

Collaboration diagram for Logger:

Public Attributes

- Logger * self
- FILE * file
- char * filename
- pthread_t thread
- bool termination_signal
- int values_read
- bool(* open)(Logger *self)
- bool(* close)(Logger *self)
- void(* destroy)(Logger *self)

3.7.1 Member Data Documentation

3.7.1.1 close

```
bool(* Logger::close) (Logger *self)
```

3.7.1.2 destroy

```
void(* Logger::destroy) (Logger *self)
```

3.7.1.3 file

```
FILE* Logger::file
```

3.7.1.4 filename

```
char* Logger::filename
```

3.7.1.5 open

```
bool(* Logger::open) (Logger *self)
```

3.7.1.6 self

```
Logger* Logger::self
```

3.7.1.7 termination_signal

```
bool Logger::termination_signal
```

3.7.1.8 thread

```
pthread_t Logger::thread
```

3.7.1.9 values_read

```
int Logger::values_read
```

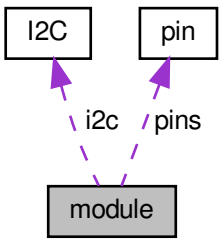
The documentation for this struct was generated from the following file:

- logger.h

3.8 module Struct Reference

```
#include <femta.h>
```

Collaboration diagram for module:



Public Attributes

- char * identifier
- pin * pins
- char n_pins
- I2C * i2c
- UART * uart
- bool initialized
- bool loaded
- bool enabled

3.8.1 Member Data Documentation

3.8.1.1 enabled

```
bool module::enabled
```

3.8.1.2 i2c

```
I2C* module::i2c
```

3.8.1.3 identifier

```
char* module::identifier
```

3.8.1.4 initialized

```
bool module::initialized
```

3.8.1.5 loaded

```
bool module::loaded
```

3.8.1.6 n_pins

```
char module::n_pins
```

3.8.1.7 pins

```
pin* module::pins
```

3.8.1.8 uart

```
UART* module::uart
```

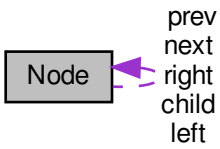
The documentation for this struct was generated from the following file:

- femta.h

3.9 Node Struct Reference

```
#include <linked-list.h>
```

Collaboration diagram for Node:



Public Attributes

- union {
  Node * next
  Node * right
  };
- union {
  Node * prev
  Node * left
  Node * child
  };
- void * value

3.9.1 Member Data Documentation

3.9.1.1 "@3

```
union { ... }
```

3.9.1.2 "@5

```
union { ... }
```

3.9.1.3 child

```
Node* Node::child
```

3.9.1.4 left

```
Node* Node::left
```

3.9.1.5 next

```
Node* Node::next
```

3.9.1.6 prev

```
Node* Node::prev
```

3.9.1.7 right

```
Node* Node::right
```

3.9.1.8 value

```
void* Node::value
```

The documentation for this struct was generated from the following file:

- linked-list.h

3.10 pin Struct Reference

```
#include <femta.h>
```

Public Attributes

- char state
- char logical
- char physical
- union {
    char voltage
    unsigned char duty_cycle
  };

3.10.1 Member Data Documentation

3.10.1.1 "@1

```
union { ... }
```

3.10.1.2 duty_cycle

```
unsigned char pin::duty_cycle
```

3.10.1.3 logical

```
char pin::logical
```

3.10.1.4 physical

```
char pin::physical
```

3.10.1.5 state

```
char pin::state
```

3.10.1.6 voltage

```
char pin::voltage
```

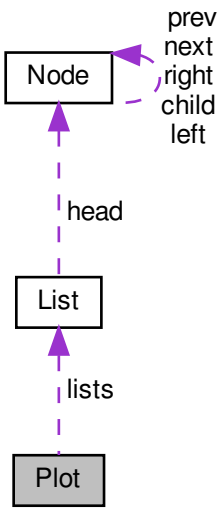
The documentation for this struct was generated from the following file:

- femta.h

3.11 Plot Struct Reference

```
#include <graphics.h>
```

Collaboration diagram for Plot:



Public Attributes

- char * name
- List ** lists
- unsigned char number_of_lists
- float min_value
- float max_value
- bool has_data

3.11.1 Member Data Documentation

3.11.1.1 has_data

```
bool Plot::has_data
```

3.11.1.2 lists

```
List** Plot::lists
```

3.11.1.3 max_value

```
float Plot::max_value
```

3.11.1.4 min_value

```
float Plot::min_value
```

3.11.1.5 name

```
char* Plot::name
```

3.11.1.6 number_of_lists

```
unsigned char Plot::number_of_lists
```

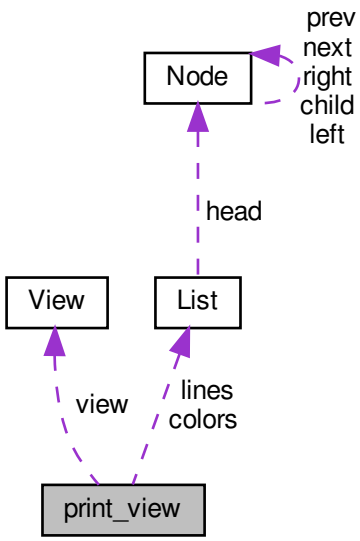
The documentation for this struct was generated from the following file:

- graphics.h

3.12 print_view Struct Reference

```
#include <graphics.h>
```

Collaboration diagram for print_view:



Public Attributes

- View * view
- List * lines
- List * colors
- unsigned char number_lines_printed
- unsigned char current_view_line
- unsigned char number_of_lines

3.12.1 Member Data Documentation

3.12.1.1 colors

```
List* print_view::colors
```

3.12.1.2 current_view_line

```
unsigned char print_view::current_view_line
```

3.12.1.3 lines

```
List* print_view::lines
```

3.12.1.4 number_lines_printed

```
unsigned char print_view::number_lines_printed
```

3.12.1.5 number_of_lines

```
unsigned char print_view::number_of_lines
```

3.12.1.6 view

```
View* print_view::view
```

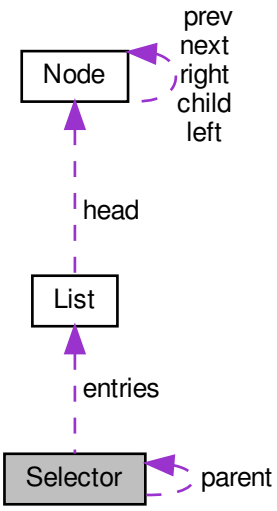
The documentation for this struct was generated from the following file:

- graphics.h

3.13 Selector Struct Reference

`#include <selector.h>`

Collaboration diagram for Selector:



Public Attributes

- char * title
- List * entries
- Selector * parent

3.13.1 Member Data Documentation

3.13.1.1 entries

`List* Selector::entries`

3.13.1.2 parent

`Selector* Selector::parent`

3.13.1.3 title

```
char* Selector::title
```

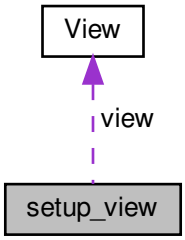
The documentation for this struct was generated from the following file:

- selector.h

3.14 setup_view Struct Reference

```
#include <graphics.h>
```

Collaboration diagram for setup_view:



Public Attributes

- View * view

3.14.1 Member Data Documentation

3.14.1.1 view

```
View* setup_view::view
```

The documentation for this struct was generated from the following file:

- graphics.h

3.15 View Struct Reference

`#include <graphics.h>`

Public Attributes

- WINDOW * window
- unsigned char inner_width
- unsigned char inner_height
- unsigned char outer_width
- unsigned char outer_height

3.15.1 Member Data Documentation

3.15.1.1 inner_height

`unsigned char View::inner_height`

3.15.1.2 inner_width

`unsigned char View::inner_width`

3.15.1.3 outer_height

`unsigned char View::outer_height`

3.15.1.4 outer_width

`unsigned char View::outer_width`

3.15.1.5 window

`WINDOW* View::window`

The documentation for this struct was generated from the following file:

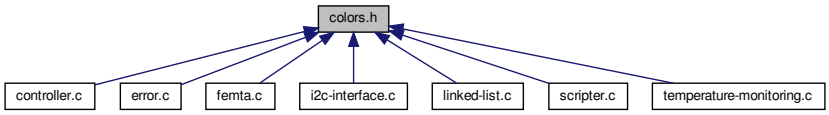
- graphics.h

Chapter 4

File Documentation

4.1 colors.h File Reference

This graph shows which files directly or indirectly include this file:



Macros

- #define RED "\e[0;31m"
- #define GREY "\e[0;35m"
- #define BLUE "\e[0;34m"
- #define GREEN "\e[0;32m"

```

4.1.1.15 RESET

```
#define RESET "\e[0m"
```

4.1.1.16 UNDIM

```
#define UNDIM "\e[22m"
```

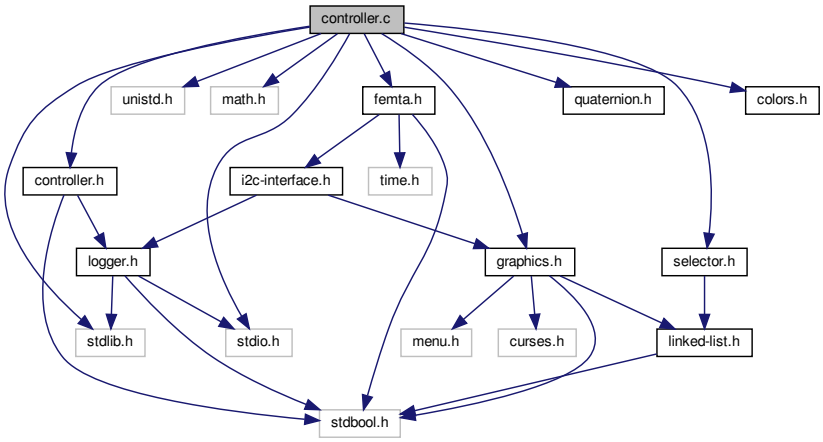
4.1.1.17 YELLOW

```
#define YELLOW "\e[0;33m"
```

4.2 controller.c File Reference

```
#include <stdlib.h>
#include <stdio.h>
#include <unistd.h>
#include <math.h>
#include "femta.h"
#include "controller.h"
#include "quaternion.h"
#include "graphics.h"
#include "selector.h"
#include "colors.h"
```

Include dependency graph for controller.c:



Functions

- void ramp_up (void *nil)
- void pyramid (int stepsize, int timebtwn)
- void set_bank_speed (bool CW, bool CCW, int pwm_num)
- float rise_time (float phi_des)
- float tracking_signal_value (int phi_des, float t, float tr)
- float get_mpu_val ()
- void PID_controller (bool CW, bool CCW, float init_or, float dor)

Variables

- int default_step_size = 0
- int default_time_between = 0

4.2.1 Function Documentation

4.2.1.1 get_mpu_val()

```
float get_mpu_val ( )
```

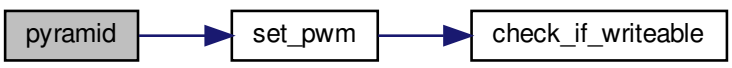
4.2.1.2 PID_controller()

```
void PID_controller (
            bool CW,
            bool CCW,
            float init_or,
            float dor )
```

4.2.1.3 pyramid()

```
void pyramid (
            int stepsize,
            int timebtwn )
```

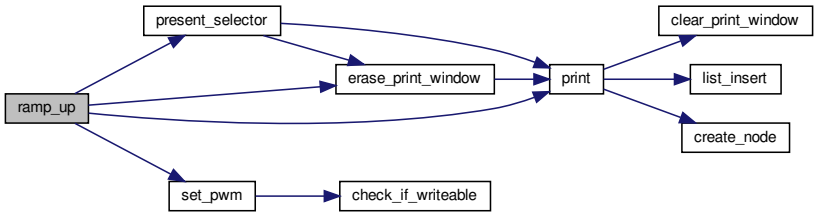
Here is the call graph for this function:



4.2.1.4 ramp_up()

```
void ramp_up (
            void * nil )
```

Here is the call graph for this function:



Here is the caller graph for this function:

4.2.1.5 rise_time()

```
float rise_time (
            float phi_des )
```

4.2.1.6 set_bank_speed()

```
void set_bank_speed (
            bool CW,
            bool CCW,
            int pwm_num )
```

Here is the call graph for this function:

4.2.1.7 tracking_signal_value()

```
float tracking_signal_value (
            int phi_des,
            float t,
            float tr )
```

4.2.2 Variable Documentation

4.2.2.1 default_step_size

```
int default_step_size = 0
```

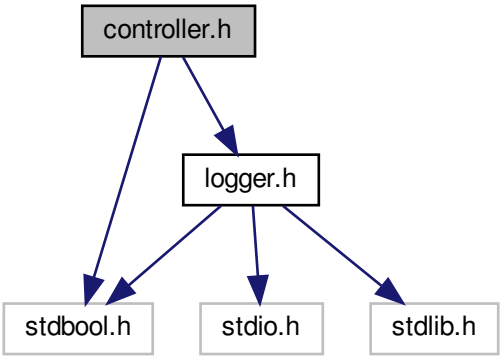
4.2.2.2 default_time_between

```
int default_time_between = 0
```

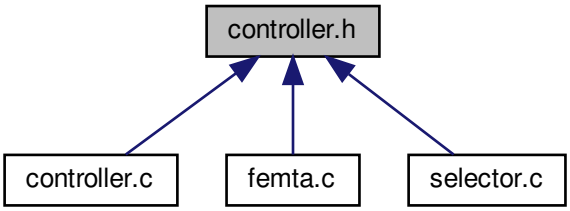
4.3 controller.h File Reference

```
#include <stdbool.h>
#include "logger.h"
```

Include dependency graph for controller.h:



This graph shows which files directly or indirectly include this file:



Macros

- #define MIN_SAT 0
- #define MAX_PWM 0
- #define PID_ERR_TOL 0.05
- #define PI 3.14159265

Functions

- void ramp_up (void *nil)
- void pyramid (int stepsize, int timebtwn)
- void set_bank_speed (bool CW, bool CCW, int pwn_num)
- float rise_time (float phi_des)
- float tracking_signal_value (int phi_des, float t, float tr)
- void PID_controller (bool CW, bool CCW, float init_or, float dor)

Variables

- Logger * pid_logger

4.3.1 Macro Definition Documentation

4.3.1.1 MAX_PWM

```
#define MAX_PWM 0
```

4.3.1.2 MIN_SAT

```
#define MIN_SAT 0
```

4.3.1.3 PI

```
#define PI 3.14159265
```

4.3.1.4 PID_ERR_TOL

```
#define PID_ERR_TOL 0.05
```

4.3.2 Function Documentation

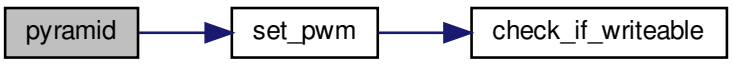
4.3.2.1 PID_controller()

```
void PID_controller (
            bool CW,
            bool CCW,
            float init_or,
            float dor )
```

4.3.2.2 pyramid()

```
void pyramid (
            int stepsize,
            int timebtwn )
```

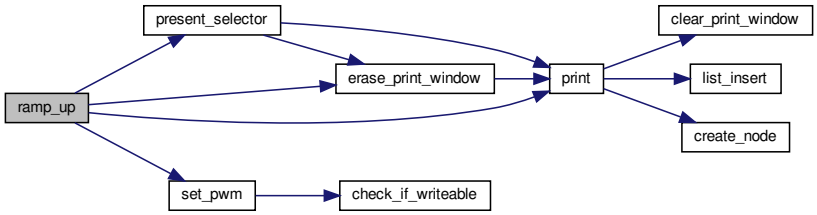
Here is the call graph for this function:



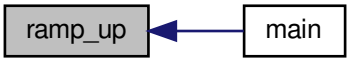
4.3.2.3 ramp_up()

```
void ramp_up (
            void * nil )
```

Here is the call graph for this function:



Here is the caller graph for this function:



4.3.2.4 rise_time()

```
float rise_time (
            float phi_des )
```

4.3.2.5 set_bank_speed()

```
void set_bank_speed (
            bool CW,
            bool CCW,
            int pwn_num )
```

Here is the call graph for this function:

4.3.2.6 tracking_signal_value()

```
float tracking_signal_value (
            int phi_des,
            float t,
            float tr )
```

4.3.3 Variable Documentation

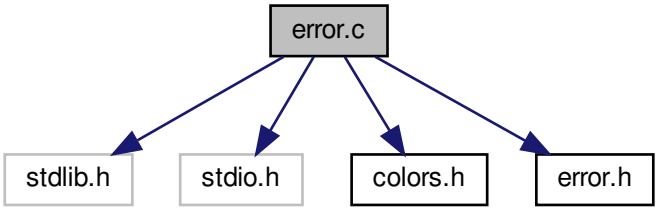
4.3.3.1 pid_logger

```
Logger* pid_logger
```

4.4 error.c File Reference

```
#include <stdlib.h>
#include <stdio.h>
#include "colors.h"
#include "error.h"
```

Include dependency graph for error.c:



Functions

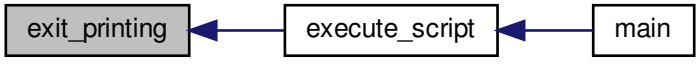
- void exit_printing (char *message, char code)

4.4.1 Function Documentation

4.4.1.1 exit_printing()

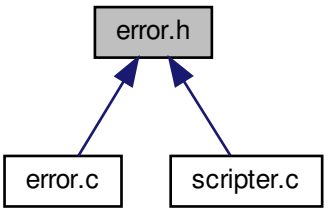
```
void exit_printing (
            char * message,
            char code )
```

Here is the caller graph for this function:



4.5 error.h File Reference

This graph shows which files directly or indirectly include this file:



Macros

- #define ERROR_PROGRAMMER 1
- #define ERROR_OS_FAILURE 2
- #define ERROR_LIBRARY_FAILURE 3

Functions

- void exit_printing (char *message, char code)

4.5.1 Macro Definition Documentation

4.5.1.1 ERROR_LIBRARY_FAILURE

```
#define ERROR_LIBRARY_FAILURE 3
```

4.5.1.2 ERROR_OS_FAILURE

```
#define ERROR_OS_FAILURE 2
```

4.5.1.3 ERROR_PROGRAMMER

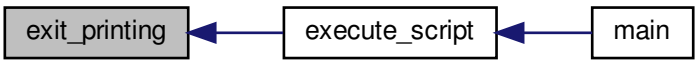
```
#define ERROR_PROGRAMMER 1
```

4.5.2 Function Documentation

4.5.2.1 exit_printing()

```
void exit_printing (
            char * message,
            char code )
```

Here is the caller graph for this function:



4.6 femta.c File Reference

```
#include <stdbool.h>
#include <pthread.h>

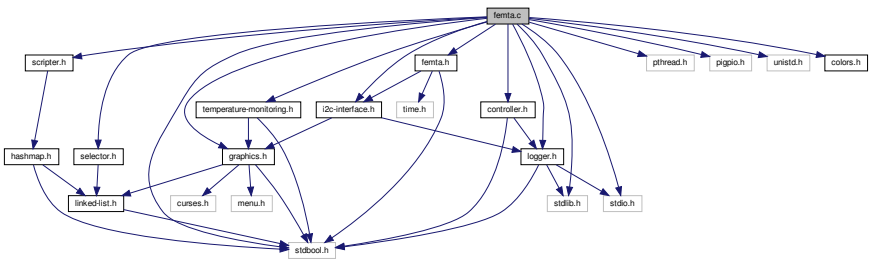
#include "logger.h"
#include "colors.h"
```

Include dependency graph for femta.c:



Macros

- #define NUMBER_OF_MODULES 4
- #define I2C_STATE 2
- #define UART_STATE 3

Functions

- void initialize_pin (pin *initialent, char logical, char physical, short state)
- void initialize_satellite ()
- void print_configuration ()
- void terminate_satellite ()
- void check_if_writeable (pin *p)
- void check_if_readable (pin *p)
- char read_voltage (pin *p)
- void set_voltage (pin *p, char voltage)
- void set_pwm (pin *p, unsigned char duty_cycle)
- int main ()

4.6.1 Macro Definition Documentation

4.6.1.1 I2C_STATE

```
#define I2C_STATE 2
```

4.6.1.2 NUMBER_OF_MODULES

```
#define NUMBER_OF_MODULES 4
```

4.6.1.3 UART_STATE

```
#define UART_STATE 3
```

4.6.2 Function Documentation

4.6.2.1 check_if_readable()

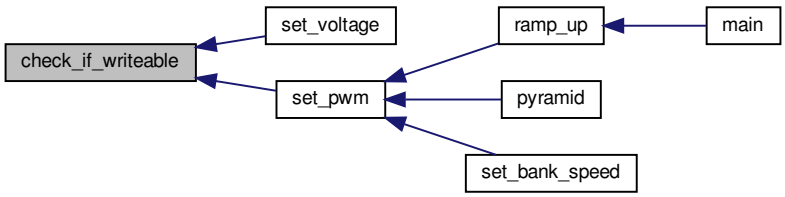
```
void check_if_readable (
            pin * p )
```

Here is the caller graph for this function:

4.6.2.2 check_if_writeable()

```
void check_if_writeable (
            pin * p )
```

Here is the caller graph for this function:



4.6.2.3 initialize_pin()

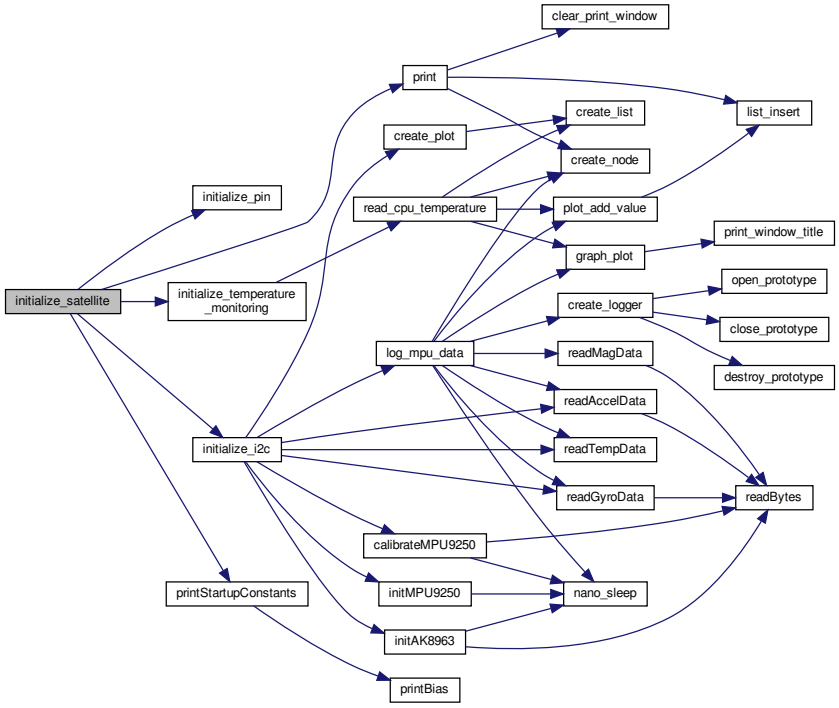
```
void initialize_pin (
            pin * initialent,
            char logical,
            char physical,
            short state )
```

Here is the caller graph for this function:

4.6.2.4 initialize_satellite()

```
void initialize_satellite ( )
```

Here is the call graph for this function:

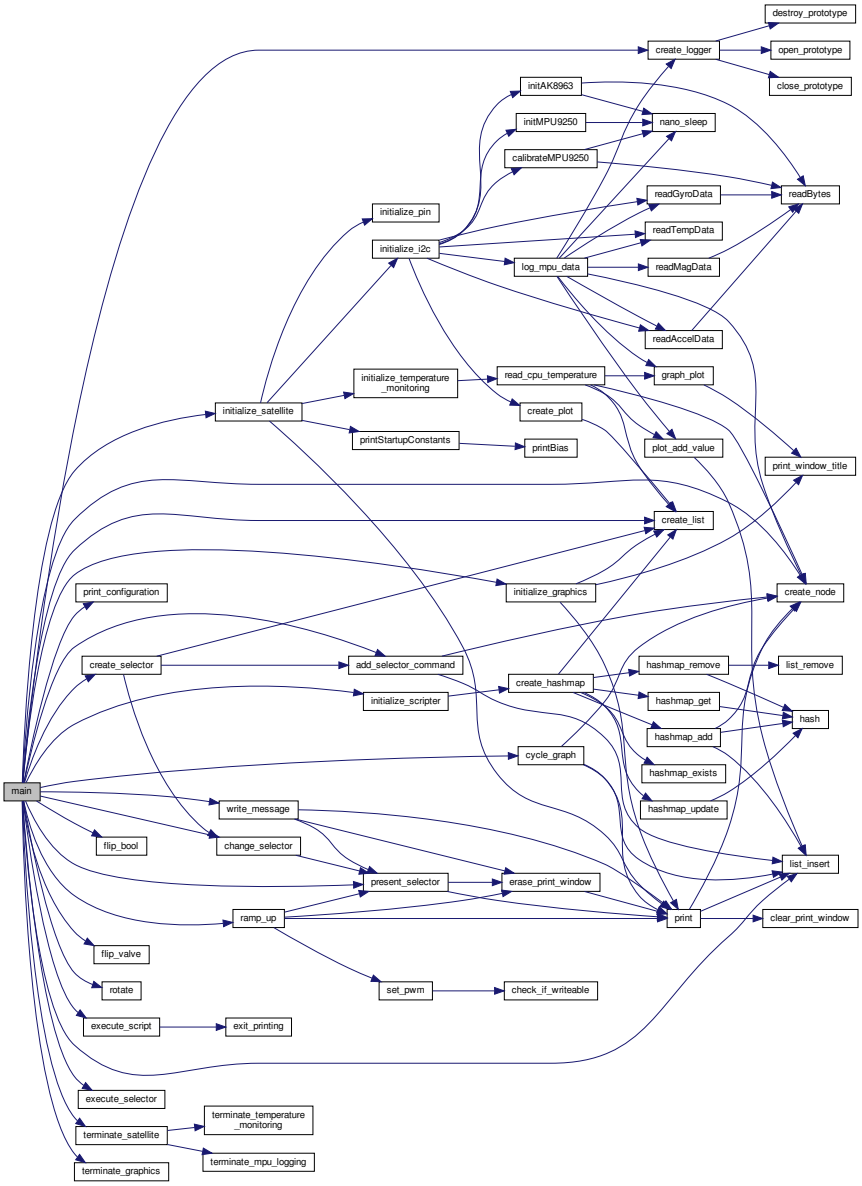


Here is the caller graph for this function:

4.6.2.5 main()

```
int main ( )
```

Here is the call graph for this function:



4.6.2.6 print_configuration()

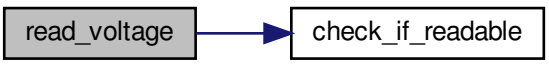
```
void print_configuration ( )
```

Here is the caller graph for this function:

4.6.2.7 read_voltage()

```
char read_voltage (
            pin * p )
```

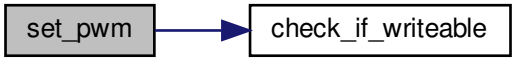
Here is the call graph for this function:



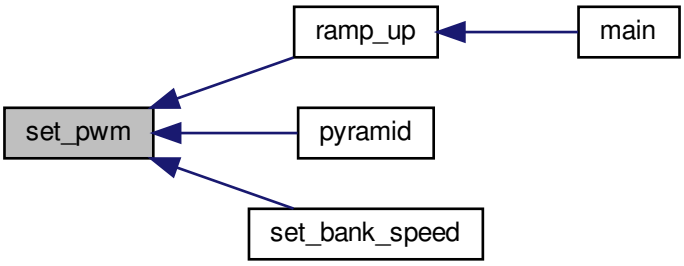
4.6.2.8 set_pwm()

```
void set_pwm (
            pin * p,
            unsigned char duty_cycle )
```

Here is the call graph for this function:



Here is the caller graph for this function:



4.6.2.9 set_voltage()

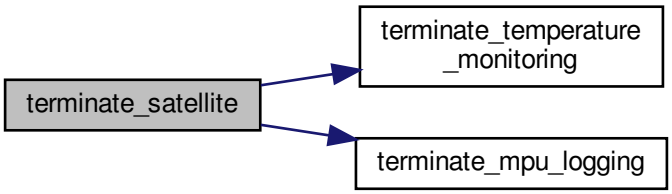
```
void set_voltage (
            pin * p,
            char voltage )
```

Here is the call graph for this function:

4.6.2.10 terminate_satellite()

```
void terminate_satellite ( )
```

Here is the call graph for this function:



Here is the caller graph for this function:

4.7 femta.h File Reference
